

Workshop in Memory of Artyom “Art” Shneyerov

Friday, October 12th, 2018

CIRANO

1130, Sherbrooke West, 14th Floor, Montréal (Québec) H3A 2M8

Organizers

Faye Diamantoudi (Concordia University, CIREQ, CIRANO)

Ming Li (Concordia University, CIREQ, and CIRANO)

Dipjyoti Majumdar (Concordia University, CIREQ)

Szilvia Papai (Concordia University, CIREQ)

Huan Xie (Concordia University, CIREQ, and CIRANO)

We gather to celebrate the work of our late colleague Artyom “Art” Shneyerov. Art received his Ph.D. in Economics from Northwestern University in 2002. He began his academic career at the University of British Columbia and joined the Department of Economics at Concordia University in 2007 as a tenured associate professor. Art had always been a brilliant, cheerful, and supportive colleague to work with. Being a researcher who was enthusiastic about his work in the fields of game theory, industrial organization and applied econometrics, Art was one of the most productive researchers in the department and in our profession. He published excellent and insightful papers on auctions and dynamic games in top journals such as *Econometrica*, the *Journal of Economic Theory* and the *Journal of Econometrics*. Art’s work and contribution was well recognized by the university and the broader economics community. He was promoted to full professor in 2014 at Concordia University, and served as an Associate Editor of the *International Journal of Industrial Organization* since 2009. Most importantly, Art had always been a supervisor and mentor who provided superior guidance and ample support to his students and junior collaborators. His former Ph.D. students, Adam Chi Leung Wong and Pai Xu, were both granted tenure at Hong Kong universities. His Ph.D. student at Concordia, Uma Kaplan, was awarded an FRQSC doctoral fellowship in 2015. Their success is inseparable from Art’s role as a great friend, supervisor, and collaborator.

Friday, October 12th, 2018

- 8:40-9:20 Registration**
- 9:20-9:30 Welcome by Jorgen Hansen (Concordia University, Department Chair)**
- 9:30-10:30 Keynote speech: Mark Satterthwaite (Northwestern University)**
“Existence of Double Auction Equilibria in Interdependent Value Environments”
Coauthors: Steven Williams, Konstantinos Zachariadis
